## MONTHLY ROYALTY

Once a user reaches the Gold Pro level, they become eligible for monthly royalty income from the following month.

To continue receiving royalty, the user must complete 30% monthly business activity based on their level.

Royalty is calculated on the next month's business performance, encouraging consistent growth.

If a user fulfills their category every month, they become part of the company's royalty pool.

Every month, 5–10% of the company's total turnover is distributed as royalty among eligible users.

Missing monthly targets may pause royalty earnings until re-qualified.

This system rewards active leaders and motivates consistent team development.

The more your team performs, the bigger your share of the royalty income.
